## Aged Care: Managing Behaviours and Symptoms of Dementia and Teamwork Challenges and Solutions

### Presented by

Dr Desmond Graham - Geriatrician (Geriatric Care)  
Kim Poyner – Executive Health Coach (MediCoach)

*This program will equip GPs and nurses working in residential Aged Care with:*

- *The key pearls of the updated Aged Care Act that impact clinical care*
- *Critical approaches to non-pharmacological and pharmacological approaches to behavioural and psychological symptoms of dementia (BPSD)*
- *Integral knowledge of support services for people with dementia and BPSD*
- *Solutions to challenges in teamwork and communication in residential aged care*

### Learning outcomes

- *Classify severity behaviours and symptoms of dementia in residents of aged care homes to guide management decisions*
- *Outline the key changes to the Aged Care Act that influence anti-psychotic prescribing practices in people with dementia living in residential aged care*
- *Recall a systematic approach to pharmacological therapy in people with dementia and behaviours, and identify referral pathways for those with severe behaviours*
- *Develop strategies to improve systems and communication with residential aged care staff*
