

Acute Stroke Action Program

An RACGP and ACCRM accredited CPD activity

Every 19 minutes an Australian has a stroke.¹ Could your patients be better protected?

Find out how by participating in Acute Stroke Action Program

Overview

GPs have a key role to play in stroke prevention and in minimising its potentially devastating impact if it does occur. This program will assist GPs in proactively identifying patients within their practice who are at increased risk of stroke and systematically implementing guideline-based management approaches to reduce stroke risk. It will also assist GPs in developing strategies to educate their staff and patients on recognising the signs and symptoms of stroke and the need for rapid action. The program will help GPs by identifying the acute stroke resources in their area and the options which might be considered for their patients suffering an acute stroke.

Activity Number 234068

This RACGP and ACCRM accredited program, supported by Boehringer Ingelheim, has been developed by an independent steering committee in collaboration with the Stroke Foundation. RACGP Activity ID: 234068
ACCRM ID: 21823

Steering committee

This meeting content was developed with input from the following Steering Committee:

- › Dr Tim Ang, Neurologist
- › Prof Martin Jude, Neurologist
- › Prof Ken Butcher, Neurologist
- › Dr Ashley Morgan, GP
- › Dr Simon Eggleton, Cardiologist
- › Dr Genevieve Thompson, GP

The program consists of three components

Module 1: Stroke prevention in general practice

Online pre-work (1 hour)
You will gain access to this upon registering for the program

A hypothetical case study is used to examine stroke risk factors and best practice approach to management in general practice.

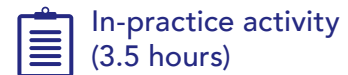

Module 2: Stroke management in general practice

Live meeting (1.5 hours)

Presented by a leading Australian neurologist, a hypothetical case study is used to assist GPs in reducing risk of stroke in patients they see everyday, including expert opinions on how to manage patients not always included in the guidelines, developing strategies to educate your staff and patients on recognising the signs and symptoms of stroke and the need for rapid action.

Module 3: Stroke prevention protocol in your practice

In-practice activity (3.5 hours)

Put what you have learnt into action by proactively identifying patients within your practice who are at increased risk of stroke and systematically implement guideline-based management approaches to reduce stroke risk and provide patient education. Learn about the resources the Stroke Foundation have to help you and your patients with the stroke pathway.

Learning outcomes

At the conclusion of the full educational program, participants will be able to:

- › Describe the serious burden of stroke in Australia and the challenges that need to be overcome to reduce this burden.
- › Proactively identify patients at increased risk of stroke within their practice.
- › Implement guideline-based management approaches to reduce risk of stroke in both patients at risk for stroke and those who have had a prior stroke.
- › Triage patients with acute stroke to help ensure optimal outcomes.
- › Develop practical strategies within their practice to ensure F.A.S.T. awareness.

Live Meeting – Module 2

Please note you must have completed the predisposing activity and module 1 before attending the meeting.

Date

Time

Location

Presenter

Agenda

- › Review of module 1 and hypothetical implications to case study
- › Acute stroke management
- › Improving awareness of stroke and TIA
- › Case study: acute event
- › Stroke response in the region

Program registration

Space in the program is limited. Register today to secure your place.

To register for this event, please complete the registration form at <https://informme.org.au/ASAP> or by email to DDB Remedy at remedy.education@syd.ddb.com

Please register by

Once you have registered for the program you will be able to access the predisposing activity and module 1, as well as the details for module 2. Following the live module 2 all of the module 3 and accreditation details will be sent to you via email.

Privacy statement: Boehringer Ingelheim Pty Limited, ABN 52 000 452 308 (BIPL/Program Sponsor) is partnering with DDB Remedy, an RACGP CPD accredited provider, and The Stroke Foundation to organise the logistics associated with your attendance and the processing of your RACGP or ACCRM CPD requirements. Please see separate link for details of The Stroke Foundation's privacy policy. All information collected by DDB Remedy for the purposes of this event will be deleted by DDB Remedy within a reasonable period following completion of the program and RACGP CPD processes. DDB Remedy will submit your personal information to the RACGP or ACCRM for processing as per your registration instructions.

DDB Remedy will provide your personal information to the Program Sponsor Boehringer Ingelheim for the purposes of: additional logistical arrangements related to your registration and attendance to the Acute Stroke Action Program managed by DDB Remedy; and for the purposes of follow up by Boehringer Ingelheim and The Stroke Foundation about this educational program, in addition to purposes related to educational and promotional communication about our products and services and to respond to your questions or requests. If you do not provide the requested personal information to us, or if you use a pseudonym, we may not be able to fully and effectively respond to your questions or requests and we will not be able to keep you up-to-date with our educational and promotional information. BIPL may share the information with our related group companies and/or third party service providers (located outside of Australia including but not limited to New Zealand, Germany, USA and Japan) who we engage to assist us with this purpose and when we do, we will take reasonable measures to ensure that those third party service providers comply with the BIPL Privacy Policies and are bound by the Australian Privacy Principles ("APPs") or similar privacy obligations. Our Privacy Policies contain information about how you can access and request the correction of your personal information. It also contains information about how you can make a complaint about a breach of the APPs and how we will deal with your complaint. You can contact our Privacy Officer at PrivacyOfficer.SYD@boehringer-ingelheim.com. You can view the Boehringer Ingelheim Privacy Policy at <http://www.boehringer-ingelheim.com.au/data-privacy>.
