

## A practical guide to alcohol home detox for GPs

*Presented by Dr Chris Davis, an experienced GP in providing primary care alcohol withdrawal and recovery services and Medical Director at Clean Slate Clinic. Alcohol and drug dependence remain major health and social problems in Australia, contributing significantly to the global burden of disease and the everyday practice of primary care.*

*Following this webinar you will be able to more confidently assess patients who are using alcohol to determine their level of dependency and gauge their suitability for GP-led home withdrawal management (detox).*

*You will be better able to explain the components of structured home detox and better understand how to conduct a post detox review and develop effective recovery plans.*

**Target Audience: GPs**
