

NATIONAL EVENT

Webinar

Changed behaviours associated with dementia utilising a stepwise patient-centred approach to management

OVERVIEW

The webinar will provide GPs and health professionals with a structured approach to assessment of behaviours and their management, including understanding the importance of patient-centred care, as well as the concept of self-hood in developing strategies to alleviate distressing or challenging behaviours.

LEARNING OUTCOMES

- Identify behaviour changes associated with Dementia
- Implement a patient-centred approach to managing changed behaviour associated with dementia
- Implement a multidisciplinary approach to the management of changed behaviour associated with dementia

SUITABLE FOR

People working as GPs, Primary Health Nurses, Health Professionals
