

Supporting clinical educators' transition to telehealth supervision: Facilitating knowledge and skill

Professional Development

[Three Rivers Department of Rural Health](#) invites you to attend this free professional development workshop. It is available to all health professional interested in or currently working with health students on clinical placements.

Have you ever considered using telesupervision, or would like to expand your telesupervision skills? Telesupervision is an effective supervision modality often utilised to overcome challenges including physical distance between the client, student and supervisor.

Workshop will include:

- Information about the perspectives of clinical educators transitioning to telesupervision
- A review the existing evidence-base regarding telesupervision in allied health
- Consideration of existing practices and support needs of clinical educators transitioning to telesupervision
- Development of practical strategies for supporting clinical educators' transitioning to telesupervision

Do not forget to bring your laptop or portable device!
