Prevent, Detect, Support.

Kidney Disease: progression and complications

-An Active Learning Module for GPs over 2 sessions

Face-to-face education

Wednesday 1 May 2019

- CKD Issues for GP's – 2 case studies
- Managing Stage 4 & 5 CKD: working with the Nephrologist

Wednesday 8 May 2019

- CKD Issues for GP's – 2 case studies
- Decision making & symptom control in End Stage Kidney Disease

Learning outcomes

- *Describe the role of the GP in preventing and detecting CKD in the primary care setting and individual cases*
- *Determine when to refer patients with CKD to a nephrologist according to the recommended clinical indicators*
- *Demonstrate the ability to correctly stage CKD and manage CKD complications common to each stage*
- *Recognise the need for dosage reduction or cessation of commonly prescribed drugs in stage 4 & 5 CKD*
- *Implement a practice-based system, to improve patient safety by identifying patients at higher risk of both CKD and established CKD*

There are **three parts** to an Active Learning Module all requiring completion for CPD point eligibility:

1. ***Pre-disposing activity and pre-reading*** (supplied by email and to be completed prior to the face-to-face event)
2. ***Attendance at both sessions, totalling six hours of face-to-face education***
3. ***Reinforcing activity*** (supplied at the face-to-face event and to be **completed 2 weeks following** the face-to-face education and returned to primarycare@kidney.org.au)
