The what, who and why
of meningococcal vaccines

Invitation

This organisation is an authorised provider of accredited activities under the RACGP QI&CPD Program

Clinical content developed by Lateral Connections at the request of, and with funding from, GlaxoSmithKline Australia Pty Ltd. ACN 100 162 481. Level 4, 436 Johnston Street, Abbotsford, Victoria, 3067. PM-AU-BEX-BROC-190001 Date of Approval: April 2019

Activity number: 156944

Invasive meningococcal disease

caused by the bacterium *N. meningitidis*
(commonly known as *meningococcus*)¹

GLOBALLY, 5 serogroups
most commonly cause disease

In AUSTRALIA, 3 serogroups
caused the majority of invasive meningococcal disease
in recent years²

- GPs play a critical role in **advising patients of available funded and private market vaccines**

Learning Outcomes

- Describe the burden and impact of invasive meningococcal disease
- Discuss the what, who and why of meningococcal vaccines
- Implement appropriate patient communication techniques to assist them to make safe and informed immunisation choices for their children
