time and money
spent travelling.

DOCTO assists GPs with patient healthcare needs.

DOCTO aims to support regional, rural and remote GPs to manage patients by offering free treatment and management advice as needed directly to GPs without the need for a patient consultation.

Recently supported by the Queensland Government's Advance Fund, DOCTO aims to integrate with existing healthcare services to strengthen the delivery of healthcare in regional Australia.

Patients are encouraged to present online with a referral from their local GP. If this is not possible, DOCTO's 24/7 'Virtual Emergency Department' can help. DOCTO also hosts a same day sick kids paediatric service.

The cost of a specialist video consultation with DOCTO is subsidised by Medicare with average out-of-pocket expenses under \$100 across our 25+ specialties. Offering streamlined secondary care options for patients, DOCTO acts as a doorbell to specialist care throughout Australia.

DOCTO matches patients with the most appropriate specialist based on location, availability and expertise with appointments offered within 5-7 days of a booking.

Providing high quality and accessible healthcare for all Australians is our mission! DOCTO is affordable, responsive, and reputable, having helped over 20,000 patients since 2015. The average cost to use DOCTO's telehealth service is far less than travel or lost work time. With internet access, and a device with a camera, anyone can reach quality healthcare from wherever they are.
